Question-5:

Create Watson assistant service with 10 steps and use 3 conditions in it. Load that script in HTML page

Solution:

The screenshot displays a web browser window with the address bar showing the file path `C:/Users/Lenovo/Desktop/bot.html`. The page content includes a section titled "HTML Forms" with two input fields: "First name:" containing the text "cloud" and "Last name:" containing the text "bot". Below these fields is a "Submit" button. A text instruction states: "If you click the 'Submit' button, the form-data will be sent to a page called 'action_page.php'."

Overlaid on the right side of the browser window is a mobile application interface for "Watson Assistant". The app has a pink header with a home icon and the text "Watson Assistant". A chat bubble from "healthbot" contains the message "Make your appointment?". Below the message are two buttons: "Yes" and "No". At the bottom of the chat interface is a text input field with the placeholder "Type something..." and a send button. A footer at the bottom of the app interface says "Built with IBM Watson®".

At the bottom of the screenshot is the Windows taskbar, showing the search bar with the text "Type here to search", several application icons, and the system tray displaying the temperature as 31°C, the time as 22:05, and the date as 17-10-2022.
